Prueba de inglés   Roldán Sanchis Martínez

Hi, dear teachers of Computer Systems.

My name is Roldán from 1st of DAM and I letter you
all to talk about the subject and my personal opinion.
On one hand, I really enjoyed converting binary numbers
to decimar and octal, and converting decimal and octal
to binary.
On the other hand, I won't say I suffered but I didn't
enjoy too much using Linux commands. Thing, by the
way I strongly believe it's really usefull, but
I don't like at all.

To conclude, the subject of Computer Systems it's
really important to DAM but one of the hardest
(in my personal opinion). I would like to say that
to improve the experience of learning CS, it will be
nice to add some extra interactive materials like
online tasks weekly (short, of course), some exercises
to practice and so on.

And, finally, I would like to say that CS is harder
enough to not learn it in english, please.
It will be a better way to learn in spanish, and let english to PRG.
Best regards, Roldán Sanchis Martínez.
